

TWANA™ TOUCH

INTERACTIVE CUSTOMER RECEPTION KIOSK

The Twana™ Touch kiosk is part of our solution for customer reception management. Its screen allows you to receive, identify and efficiently direct your customers to multiple services.

The front is fully customizable and can be easily modified to integrate seamlessly into your reception environment.

With its 40° angle tilt and its advanced position compared to the totem, the screen is easier to access (especially for wheelchair users) and has a wide viewing angle.
